

Objectives of Severstal on Environment, Health and Safety by 2025

Severstal sets public, specific, measurable and achievable goals in the areas of health, safety and environmental protection to confirm our commitments in this area and define a method to monitor progress while increasing our transparency.

2018-2025 Environmental Improvement Objectives

1. By 2025, reduce the weight of discharged wastewater pollutants¹ into water bodies (above wastewater discharge limit value²) by 12%*.
2. By 2025, reduce the weight of waste disposed³ of by 20%**.
3. By 2025, reduce total atmospheric emission of pollutants⁴ by 13% (by 66.5 thousand tonnes) against 2017 levels***.

* PAO Severstal Cherepovets production site compared with the weight of discharged pollutants in 2017

** Divisions Severstal Russian Steel and Severstal Resources compared with the weight of waste disposed of in 2017

*** Divisions Severstal Russian Steel and Severstal Resources

2018-2025 Health and Safety Objectives

4. By 2025, reduce LTIFR by 50% compared with 2017 and eliminate all work-related fatalities with our personnel⁵
5. By 2025, ensure all businesses to achieve ISO 45001 certification

¹ Ammonium cation, nitrites, manganese, copper, nickel, sulfates, fluorides, zinc, oil products, iron

² Wastewater discharge limit value (NDS) is a mass of a substance in wastewater maximum allowable for discharge, with a view to assuring water quality at a test point as determined by the Federal Law of the Russian Federation No. 7-FZ on environmental protection of 10 January 2002

³ Except heavy waste of Severstal Resources (overburden and tailings)

⁴ Dust/particulate matter, sulphur dioxide, carbon monoxide, other

⁵ Though the stated target of zero fatalities refers to our own staff, Severstal also requires all its business partners to respect the highest standards of health & safety and environmental sustainability in their work with our company. Please view the Code of Business Conduct of Severstal.
